

Know the basics

Being prepared and knowing the signs

Parents are usually good at noticing when something is wrong with their baby from quite early on. It is normal to worry that you won't recognise the signs that your baby is unwell. Trust your instincts, you know your baby best.

Learn how to spot the signs of serious illness and how to cope if an accident happens. If you know the basics and you are prepared, you will find it easier to cope.

Keep a small supply of useful medicines in a locked cabinet or somewhere up high where a child cannot reach them. See pharmacist says, for things to have at home just in case. **Make sure you've got the right strength of medicine for the age of your child**, always follow instructions carefully and check use by dates. Read the label carefully.

If your baby seems to have a serious illness get medical help straight away.

Paracetamol and ibuprofen

Fever in itself is just a sign of your child's body fighting an infection. Consider using either **sugar-free** paracetamol or ibuprofen for children with significant fever who appear distressed (a temperature of over 38°C), as these can help to reduce fever and pain. Treat them with either paracetamol **OR** ibuprofen in the first instance. It can take up to an hour for either of them to work.

Paracetamol and ibuprofen should **NOT** be given together at the same time. However, if your child remains distressed before the next dose is due, then you may want to try a dose of the other medicine. Aspirin should not be given to children under 16 years of age.

Pharmacist says

Keep a small supply of useful items. Include things like:

- Thermometer
- Plasters
- Liquid painkillers (e.g. sugar-free paracetamol or ibuprofen)
- Barrier cream

If a child in your care is ill or injured, choose from the following services available:

Concern	Service	What to do?
<ul style="list-style-type: none">▪ Grazed knee▪ Sore throat▪ Coughs and colds	Self Care	You can treat minor illnesses and injuries at home by using the recommended medicines and making sure they get plenty of rest www.nhs.uk
